Keep Our Corded Workplace Safe!

Practice good cord management

Ensure all cords are covered and no frays or breaks in the cord have appeared

Secure your cords to remove a tripping or yanking hazard

Move cords out of reach of young children

Limit outlets to high powered applicances

Appliances such as refridgerators, stoves, washers and dryers should have their own outlets

Never run multiple extension cords and

Always use a power strip that is rated for the job!

Never string together power strips or extension cords in series power strips, from the same outlet. Call a certified electrician to install more outlets in your home

Secure your cords
